the problem is that I would like to modify the name of the symbol for only one time... Solved: Dynamic Block is still not editable I am using Dynamic Block, but i am unable to edit the properties of it. I can edit only the properties in Model Browser. Also, I am unable to view the properties in the block that are being used in the current drawing. Solved: Hi, I have a problem with a AutoCAD dynamic block. I created a Dynamic Block based on the the name of a Custom Block and it created the new block and connected it to the Custom Block. The problem is that I would like to edit the name of the Dynamic Block based on the Custom Block, but it is not editable... Solved: Dynamic block name Hi, I have created a dynamic block based on the name of a custom block, and it creates the new block and connects it to the custom block, but I can't edit the name of the block... Solved: Dynamic block properties I created a dynamic block based on a CUSTOM block, and I cannot edit the properties. I can edit the properties only in the model browser. Please, any help or suggestion. Thanks Solved: Error "The child could not be opened" When I try to open a DWG that contains several DWG's in the same folder, I get the following error message: "The child could not be opened. No model was found that is associated with the name of this drawing." How can I get rid of this error message? Thank you for your help.Q: What is the difference between Rails 2.3.5, 2.4.5 and 2.5.0? I am now using Rails 2.5.0 and trying to migrate an app from Rails 2.3.5. I found some changes between 2.3.5 and 2.4.5. What is the difference between them? A: I do not think there is any difference in rails 2.3.5 and 2.4.5, at least from the rails app I use for production, where nothing has changed. Most of the changes you mentioned are probably related to new features introduced in rails 2.5.0. Please also refer to Rails 2.3.5 vs 2.4.5 vs 82157476af
