CSVed 5.22.0.0

In this version of the software we have prepared a better, faster conversion of CSV files (comma-separated values), although it is used to be known as "RTF (Rich Text Format) files. It is possible to open any type of information in a list view, modify it, edit it, and save it in any popular format. The program allows you to insert rows or columns, remove rows or columns, merge two or more tables into one table with predefined headers, change column names, and also to sort columns or the entire table. You can open, modify and save information directly from a text editor or simply insert this information into a spreadsheet or another application like .doc, .xls, .ppt, .txt. Also, the program is very useful to find out information which is not available in the file, insert additional information, add rows or columns, etc. The conversion process is completely automated, so it is very easy to get used to it. If a letter is changed in the files, it will be converted automatically to ASCII. Some more advantages of the program are: - The ability to open and save in any format, for example, ASCII, HTML, Rich Text Format (RTF), Tagged Image File Format (TIFF) and so on; - The program is very easy to learn because the interface is very user-friendly and it is intuitive and without any problems; - It is possible to open, modify and save information directly from a text editor or simply insert this information into a spreadsheet or another application like Word, Excel, .doc, .xls, .ppt, .txt, etc.; - Detects duplicate entries (DUPLICATE KEY) or random keys with a very simple procedure; - It is also possible to hide all the table contents with only one command; - Automatic conversion of character encoding (a very simple solution in a Unicode file); - Ability to change information saved as a series in a special folder; - The ability to add a prefix and suffix to any column; - Display the contents of a column to the right or left side; - The ability to correct or convert information in a table according to the number of decimals; - The ability to merge two or more tables into one; - Ability to sort a column or an entire table; - Filter the information and save the filtered items to the computer; - Ability to add,

What's New in the CSVed?

CSVed is a handy and reliable application designed to help you handle CSV files, no matter their separator. Practically, it can be used for every operation you can think of: edit table content and add new items, change the separator, remove duplicates or sort information. The program provides users with a clean interface, where the content of the opened CSV file is displayed in a list view. The records can be edited either with the help of the 'Edit Form' or using the 'Text Editor', which displays each item in the table, separated by comma. There are a wide variety of actions that you can perform with CSVed. You can change the start row, change column names, add new items, hide entries, set a new column order or rapidly change the display format in a date field. It also provides basic options for column editing (edit, copy, add new), while also enabling you to add random numbers, row numbers or empty rows. In addition, you can join and split columns or split the whole table into several smaller CSV or TXT files. Adding prefixes and suffixes, inserting characters, change data width limit, append and merge files or detect and remove duplicate entries are other options that you have at your disposal. The 'Fixed Length Manager' helps you set a fixed length for each field and truncate column data. CSVed also allows you to filter the table information and save the filtered items to your computer, as well as sort the table columns alphabetically. The search and replace features can be used to quickly find certain words or expressions in the CSV file. The software comes with a built-in converter that you can use to export the CSV file to XML format, but you can also export the file to HTML, Excel, Word and more. In addition, it provides you with a checking tool (scans the CSV file against errors) and a repair utility (fixes all the detected errors). To conclude with, CSVed is a complete CSV file editor that features multiple options for manipulating CSV files in any way you want. CSVed Details: CSVed is a handy and reliable application designed to help you handle CSV files, no matter their separator. Practically, it can be used for every operation you can think of: edit table content and add new items, change the separator, remove duplicates or sort information. The program provides users with a clean interface, where the content of the opened

CSV file is displayed in a

System Requirements:

Minimum: OS: Windows Vista SP1 (64 bit) Processor: 1.4 GHz Dual-Core Memory: 2 GB RAM
Graphics: Microsoft DirectX 9.0-compatible with Pixel Shader 4.0 DirectX: Version 9.0c Direct3D:
Version 9.0c Network: Broadband Internet connection required for installation Hard Drive: At least 8
GB available space for installation Additional: Stereo speakers and headphones Recommended: OS:
Windows Vista SP1 (
